However Users within an Account may be located anywhere in the world.

2. OWNERSHIP AND GRANT OF LICENSE

- 2.1. The Licensed Materials are licensed to You, not sold. The Licensed Materials are the sole property of Altium and/or its licensors and are protected by all applicable Intellectual Property Rights and contract laws. In accepting this EULA, You acknowledge that all Intellectual Property Rights in the Licensed Materials are and will remain the sole property of Altium and/or its licensors. Nothing contained in this EULA will be construed as granting You by implication, estoppel or otherwise any ownership, license or other rights except the licenses and rights expressly granted to You in this EULA or as provided by law.
- 2.2. When You have purchased Your license to a Product on a perpetual basis, and upon payment of the applicable license fees, Altium hereby grants to You a non-exclusive, non-transferable license to:
 - 2.2.1. Use the Licensed Materials in accordance with the geographic scope and number of Users for which you have licensed the same, solely for the design, simulation, implementation and/or manufacture of Licensed User Products.
 - 2.2.2. Make, have made, use, sell or otherwise distribute Licensed User Products developed from the Licensed Materials or, in Your discretion, incorporating all or any portion of the Libraries to Your customers.

- 2.3. When You have purchased Your Altiflex license and upon payment of the applicable license fees:
- 2.3.1. Named Users within Your Account, as designated by separate email addresses, shall have access to the Licensed Materials for the time period You have purchased. The minimum time period is one (1) month.
 - 2.3.2. All such named Users must access the Licensed Materials only under the Plan chosen by You. Such named Users may be employees or contractors so long as every User is subject to appropriate confidentiality requirements in connection with use of the Licensed Materials.
 - 2.3.3. Some Products have varying levels of functionality and You will designate the purchased level of functionality in the applicable documentation. Some Products may only be available within certain Plans.
 - 2.3.4. An Account may be set up so as to give the Account administrator varying levels of control over the named Users. The administrator may pre-approve all or only specified named Users for access to the Licensed Materials without further approval being required. The administrator may also require notice that a named User desires access to a Product and provide approval, or no approval, at the time of such request.
 - 2.3.5. Within the Altiflex program access to any Product and the Licensed Materials provides access to the most recent and all previous versions thereof that continue to be supported by Altium.
 - 2.3.6. A combination of the Product(s) and Plan chosen for an Account defines a price per named User per month for access to the licensed Product(s). The monthly cost to an Account is the price per named User multiplied by the number of named Users the Account has paid for to access the Product(s). Pricing is based upon access, not actual use. An Account may add Products or named Users at any time without the need for negotiating a new license or contract and such additional Products or Users will be included in the next billing cycle. Where You have purchased and paid for access to Products under Altiflex on a yearly or longer basis Altium shall appropriately pro-rate the cost of any additional Products or named Users for such time period.
 - 2.3.7. When You have previously purchased a license to an Altium Product on a perpetual or time-limited basis but wish to convert such license to a named User license under the Altiflex program such prior licenses will be deactivated and new licenses shall be granted for the Products and Plan You have chosen to purchase. All licenses within a given Account must then be named User licenses; that is, You cannot mix and match prior perpetual or Time-based licenses with named User licenses within Your Account. In the event You later determine that You do not want to license a Product under the Altiflex program, You may ask Altium to reactivate Your licenses to the prior licensing model used when You first acquired such licenses, at the version number of such Product when it was previously deactivated. Upon any such reactivation You will receive new Product updates, upgrades and bug fixes only if You have purchased new Subscription services for the same.
- 2.4. From time to time Altium may provide certain end-users with certain software that contains code for experimental testing and evaluation (which may be either alpha or beta, collectively "Beta Code"). At times Altium also provides for "Open Beta" where any user may provide feedback to Altium on the Beta Code. Such Beta Code may be provided to a limited set of end-users pursuant to a separate agreement or may be provided to all end-users under an "Open Beta" approach. The following provisions shall apply to use of any such Beta Code under either approach:
- 2.4.1. Such Beta Code is provided to You as a beta tester "as is," under a temporary, non-transferable, non-exclusive license for experimental use to test and evaluate the Beta Code without charge for a limited period of time specified by Altium. You understand and agree that the Beta Code is still experimental and is not to be used for production purposes. In no event is Altium obligated to release any Beta Code commercially in any form. If You act as a beta tester of Beta Code for Altium You agree to evaluate and test the Beta Code without compensation under conditions as directed by Altium and to allow Altium to collect information regarding various aspects of Your use of the Beta Code. You further agree to communicate periodically with Altium to report on or discuss any malfunctions or suggested improvements to the Beta Code. You further agree that upon completion of Your evaluation and testing You will promptly send to Altium a written report summarizing Your evaluation of the Beta Code, including its strengths, weaknesses and recommended improvements.

- 2.4.2. You agree to maintain the Beta Code in confidence and to restrict access to the Beta Code, including the methods and concepts utilized therein, solely at that location and to those persons authorized by Altium to perform such beta testing. You agree that any written evaluations and all inventions, product improvements, modifications or developments that Altium conceives or makes during or subsequent to this EULA, including any based partly or wholly on Your evaluation and feedback, as well as any submissions by You regarding the Beta Code will be the exclusive property of Altium.
- 2.5. This EULA grants You the right to install and use the Licensed Materials in accordance with Your License at the site(s) and for the number of users for which You have licensed the Licensed Materials from Altium. Notwithstanding the foregoing, Altium permits You to make Temporary Use of the Licensed Materials so long as such use does not result in the use of more copies of the Licensed Materials than You are permitted to use at any given time. In the event that You desire to expand or extend Your use, or to migrate to different Products or functionality within any such Products, You must notify Altium prior to any such expanded or extended use and arrange for the licensing of and payment for the applicable Licensed Materials.
- 2.5.1. Unless otherwise expressly permitted herein, In no event shall You: a) allow any of Your affiliates, subsidiaries or divisions, any portion of Your business located at a different geographic site, or third parties, to copy, have access to, or use any portion whatsoever of the Licensed Materials unless You have obtained the proper licenses for all such use (notwithstanding the foregoing, You may make a Temporary Use of the Licensed Materials as stated in Section 2.3 above); b) allow any third party to have access to or use any portion whatsoever of the Licensed Materials, unless such access or use is in connection with a Temporary Use by You in carrying out a legitimate business purpose that does not otherwise violate the terms of this EULA, including but not limited to the restrictions on number of users; c) make copies of the Licensed Materials for use by any of Your other affiliates, subsidiaries or divisions, or by any third party; d) allow more than the number of permitted users to access and use the Licensed Materials at any one time, including any Temporary Uses, unless you have negotiated with Altium for a license that permits an unlimited number of users to access and use the Licensed Materials; e) allow persons not covered by the geographic scope of Your licenses to use the Licensed Material on a “floating” or other basis; or f) use the Licensed Materials in any way that is not in compliance with Permitted Uses.
- 2.5.2. For each License to a Product purchased by You You may install and use only a single copy thereof at any given time, and said copy may be used only by You; provided, however, that if You have licensed the Licensed Materials for use on a single computer: a) you may install a second copy of the Licensed Materials on a second computer solely for use in connection with, and governed by, the License granted herein, so long as such copy is never used simultaneously with the original copy; and b) You may make a back-up, archival copy thereof that You shall install and use only in the event the original copy of the Licensed Materials is lost, corrupted or in some other way made unavailable other than through use or possession by another person.
- 2.5.3. This EULA allows persons hired as contractors (so long as such contractors have entered into an appropriate form of a confidentiality agreement with You that extends to Altium’s confidential information) by You to use the Licensed Materials as if they were Your employees. At no time shall You permit the number of persons that may access and/or use the Licensed Materials to exceed the number of persons for whom You have licensed the same, whether employees or contractors. You understand and agree that such use beyond that licensed hereunder, whether by allowing excess users to use the Licensed Materials or otherwise, shall constitute not only breach of this EULA, but a violation of national and international copyright laws and pursuant to this EULA shall result in immediate termination hereof, whether Altium is aware of such breach or not at the time or discovers it later.
- 2.5.4. You may increase the number of users permitted to use the Licensed Materials at any time by paying Altium additional license fees in accordance with the applicable pricing at that time, provided that such additional users in no way access or use the Licensed Materials prior to any such additional license fees being paid by You.

3. FURTHER RESTRICTIONS ON USE, DISCLOSURE; CUSTOMER DATA; THIRD-PARTY LICENSE RIGHTS

- 3.1. In no event shall You be permitted to sell, license or otherwise commercialize the Licensed Materials as standalone products. You may include Libraries only within Licensed User Products.
- 3.2. In no event shall you disclose, transfer, assign, publish, distribute, provide in a service bureau, rent, lease or in any other way make available to any other person or entity the Licensed Materials or any part thereof without the prior written consent of Altium.
- 3.3. Except where limited by local law, You understand and agree that in no event shall You make unauthorized copies of, decompile, reverse engineer, disassemble, modify, or otherwise reduce the Licensed Materials or any portion thereof to a human-perceivable form, or disclose to any third person any portion of the Licensed Materials in human-perceivable form. You may not modify the Altium Products provided with the Licensed Materials so as to circumvent any restrictions on use afforded by the Altium Security System supplied with such Products no matter what the mechanism for such circumvention, including but not limited to any virtualization method or any method not yet devised.
- 3.4. You may not provide, disclose or in any other way make available to others, including but not limited to your affiliates, subsidiaries or divisions (unless You have licensed the Licensed Materials in such a way as to permit such use), or any third parties, any of the Licensed Materials without the prior written permission of Altium; provided, however, that You may provide device programming files, namely bit-stream files or PROM files, to third persons without such prior approval solely for use in the manufacturing of Licensed User Products. In the event that You hire or engage any contractor to assist You in connection with the installation, implementation or other use of the Licensed Materials, You shall first determine that said contractor is not employed or engaged by any direct competitor of Altium, and in the event, such contractor is so employed or engaged, You shall in no event give such person access to the Licensed Materials; in the event such contractor is not employed by or engaged by a direct competitor of Altium, You shall ensure that such contractor has entered into an appropriate confidentiality agreement that protects the Licensed Materials in a manner consistent with the confidentiality and other provisions in this EULA.
- 3.5. You understand and agree that the Licensed Materials may contain computer software and intellectual property belonging to third parties or be provided under open source licenses and that use of such computer software is for development and production purposes only. In some cases, You will need to obtain a separate license to third-party products that work in collaboration with Altium's products or services. You agree to indemnify, defend and hold harmless Altium and its officers, directors, employees, resellers, distributors, and agents against any third-party claims and claimed damages (including but not limited to attorneys' and experts' fees) relating to Your use of the Licensed Materials in violation of this EULA or any third-party rights.
- 3.6. In the event that You use the Licensed Materials in connection with one or more of the following applications, You shall indemnify, defend and hold Altium and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury, death, or other damages associated with such unintended or unauthorized use, even if such claim alleges that Altium was negligent regarding the design of the Licensed Materials: the operation of weapons, weapons systems, nuclear installations, means of mass transportation, aviation, life-support computers or equipment (including resuscitation equipment and surgical implants), pollution control, hazardous substance management, or for any other application in which the failure of the Licensed User Products could create a situation where personal injury or death may occur.
- 3.7. During the term of this Agreement, Altium shall have the right to request that You provide within thirty (30) days of receipt of Altium's written request sufficient documentation to support, and certification of, use of the Licensed Materials in compliance with this EULA's terms and conditions and the manner in which you have licensed such Licensed Materials.
- 3.8. You acknowledge that Altium's Licensed Materials are subject to U.S. export jurisdiction. You agree to comply with all applicable international and national laws that apply to Altium's Licensed Materials, including, but not limited to, the U.S. Export Administration Regulations ("EAR") and sanctions imposed by the Office of Foreign Assets Control ("OFAC"), as well as end-user, end-use and destination restrictions enforced by the U.S. and foreign governments.

- 3.9. You are solely responsible for determining the jurisdiction and classification of any data uploaded to Altium 365, obtaining all required export or reexport authorizations, and implementing compliance measures designed to ensure only legally authorized persons access the data.
- 3.10. You represent and warrant to Altium that You shall not engage in the re-export of Licensed Materials contrary to U.S. and international export control and sanctions regimes. You agree that You shall immediately notify Altium in the event of any suspected or actual violation of U.S. export control and sanctions laws.
- 3.11. You are responsible for any and all activities that occur with the usage of Altium's Licensed Materials. You shall ensure that Altium's Licensed Materials are not used, transferred, or otherwise exported or re-exported to Crimea, Cuba, Iran, North Korea, Syria, or any other country in which the United States and/or European Union maintains an embargo (collectively, "Embargoed Countries") or to any person or entity on OFAC's List of Specially Designated Nationals BIS' Entity List, or other similar lists of prohibited parties under U.S. law or any other applicable laws ("Designated Person"). These lists of designated persons are subject to change without notice. By using Altium's Licensed Materials, you represent and warrant that You are not located in, under the control of, or a national or resident of an Embargoed Country or Designated Person. In the event of a violation of law occurs as a result of the release, transfer, storage, or provision of access to your data. You agree to promptly notify Altium and to indemnify and hold harmless Altium.
- 3.13. You acknowledge and agree that data provided to Altium, including but not limited to data stored in Altium 365 Service, may be retained in Altium's records and archived indefinitely in our network backups.

You acknowledge that all Intellectual Property Rights in the Licensed Materials are and will remain the sole property of Altium or its licensors. Nothing contained in this EULA will be construed as conferring by implication, estoppel or otherwise upon You any ownership, license or other rights except the licenses and rights expressly granted herein to You. Inclusion of any Libraries within Licensed User Products in no way confers upon You any ownership or other rights in such Libraries, or in any derivative works thereof.

5. CONFIDENTIALITY

No failure or delay on the part of either party in the exercise of any power, right or privilege hereunder will operate as a waiver thereof, nor will any single or partial exercise of any such power, right or privilege preclude any other or further exercise thereof, or of any other right, power or privilege.

- 16.5. TERRITORY-SPECIFIC MODIFICATIONS TO EULA

The following replace specific provisions in this EULA if You acquired the Licensed Materials in certain European Union member states; such provisions shall have no applicability to any Licensed Materials obtained outside of these countries:

Section 3.3 of this EULA is modified to add the following:

Nothing included in this EULA (including this Section 3.3) shall limit any non-waivable right to decompile the licensed software that you may enjoy under mandatory law. For example, if you are located in certain member states of the European Union (EU), you may have the right upon certain conditions specified in the applicable law to decompile the software if it is necessary to do so in order to achieve interoperability of the Software with another software program, and you have first asked Altium in writing to provide the information necessary to achieve such interoperability and Altium has not made such information available. In addition, such decompilation may only be done by you or someone else entitled to use a copy of the software on your behalf. Altium has the right to impose reasonable conditions before providing such information. Any information supplied by Altium or obtained by you, as permitted hereunder, may only be used by you for the purpose described herein and may not be disclosed to any third party or used to create any software which is substantially similar to the expression of the software or used for any other act which infringes Altium's or its licensors' copyright rights.

Section 10 of this EULA is modified to read as follows:

Subject to Section 10 as modified for Licensed Materials that are purchased in certain member states of the EU, Altium excludes all warranties only to the extent permitted by the law therein; liability for any breach of warranty is excluded except when due to Altium's gross negligence or intentional misconduct. A claim for damages arising from a defect in the Licensed Materials is only permissible if Altium fraudulently conceals such defect but in all cases subject to any statutory claims afforded to You by local law.

Section 11 of this EULA is modified to read as follows:

Altium's statutory liability for damages shall be limited as follows: (a) In the case of intentional conduct or gross negligence by Altium its liability shall be unlimited for all resulting damage; (b) in the case of ordinary negligence Altium's liability shall be unlimited in the case of injury to life, limb or health; (c) Altium shall be liable only up to the amount of damages as typically foreseeable at the time of entering into the license agreement with respect to damages caused by a slightly negligent breach of a material contractual obligation; and (d) Altium shall not be liable for damages caused by a slightly negligent breach of a non-material contractual obligation. The aforesaid limitation of liability shall not apply to any mandatory statutory liability, in particular, to liability under the German Product Liability Act, liability for assuming a specific guarantee or liability for culpably caused personal injuries. You are required to take all reasonable measures to avoid and reduce damages, in particular, to make back-up copies of the licensed software and your computer data subject to the provisions of this EULA.
